The Adaptive Armchair

A man with a grey beard and mustache, wearing a light brown button-down shirt and dark blue trousers, is standing in a room with large windows. He is leaning forward, holding the handle of a grey motorized walking aid device. The device has a high backrest, armrests, and a base with four wheels. The room has a wooden floor and a view of a city through the windows. A large yellow geometric shape is overlaid on the image, partially covering the man and the device.

STABLE WALKING
Stable support for indoor walking with integrated brake system.

SUPPORT
IN MOTION.

HOLISTIC SUPPORT

Electrical standing-up support and walking aid contributes to well-being through improved mobility.

SMOOTH MOVEMENT

The optimized dimensions and the swivel castors ensure perfect maneuverability within the living space.

INTUITIVE USABILITY

Ergonomically-placed control button and integrated brakes deliver safety and control during use.

COMFORTABLE SITTING

High-quality, easily-cleanable upholstery for comfortable sitting throughout the whole day.

COMFORT
AT REST.

ADVANCED INDEPENDENCE

Foldable armrests allow for a more convenient lateral shift on and off the chair.

E-COMMERCE FRIENDLY

Modular design includes a drop-shipping-compatible packaging size and easy assembly.

DESIGN ADAPTABILITY

New width and color variants can be created by changing only the central segments.
